OCCUPATIONS - GAMES

1. Memory game

Ania, Marta and Zuzia were responsible for preparing some memory cards in December. They created about 45 cards presenting words related to various names of people's occupations.

4. Mime - draw - describe

Zosia and Martyna prepared for us some cards with the names of people by professions. There are three different words on each card.

The rules of this game are simple.

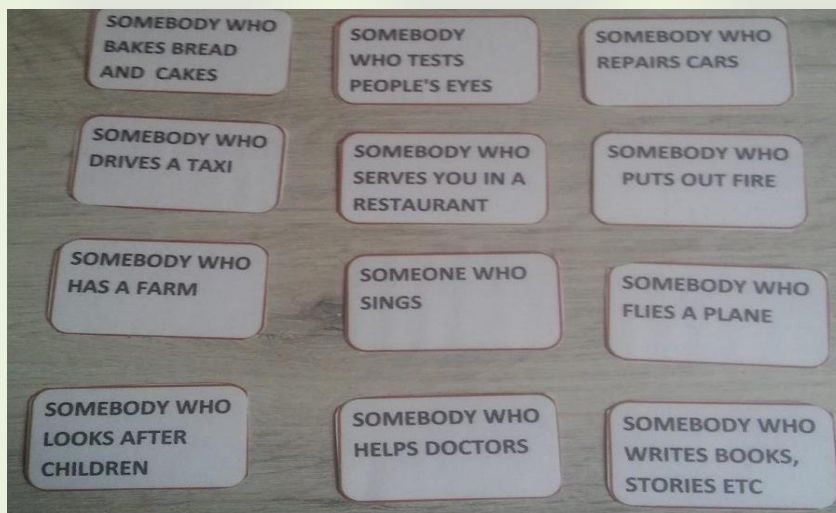

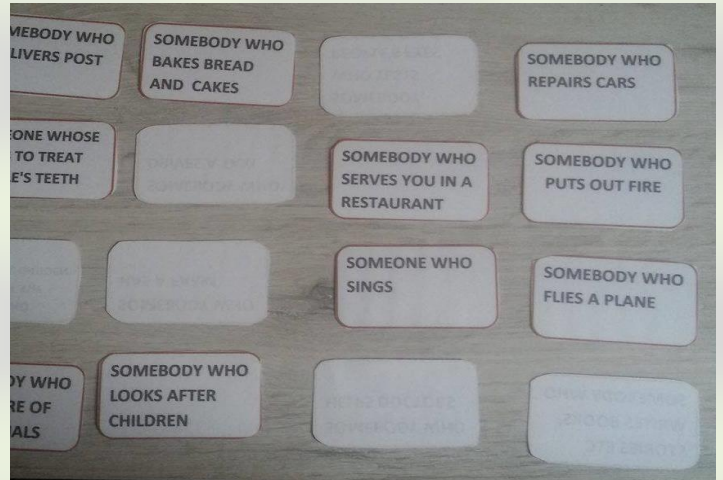

One person chooses a card and rolls the dice. When it is one or four, the student's task is to draw this word, which is at the top of the card.

The player, who throws two or five on the dice, has to mime the second word on the card. The names of occupations, which are at the bottom of the cards, should be described when the dice shows three or six.

This game is a great source of entertainment.

5. Guess the job!

The main aim of the game is to guess the job after reading its description. If a person says the correct name, he/she gets a point.
